

COMPANY PROFILE

PT. GENETIKA SCIENCE INDONESIA

NANOPORE
Service
Certified

ABOUT US

Genetika Science was established in 2008. We are part of Scitific Group of Companies, which is made up of distinct companies that focus on the distribution, sales and marketing of Life Science & Biomedical Sciences products and services in the fast growing and dynamic Asia-Pacific region. The group has been serving the Life Science research community with a comprehensive range of products and services for more than 10 years. You can trust us for whatever your laboratory needs may be.

**UNIVERSITIES/
ACADEMICS**

HOSPITALS

FOOD

**PHARMACEUTICAL &
HEALTHCARE
INDUSTRIES**

**PRIVATE
ENTERPRISES**

VISION

*TO BE THE LEADING DISTRIBUTOR OF
LIFE SCIENCE RESEARCH PRODUCTS IN
INDONESIA*

MISSION

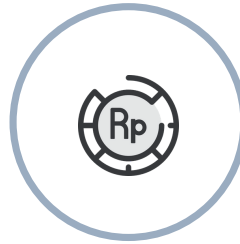

*TO BE ACKNOWLEDGED AS A LEADER IN
LIFE SCIENCE MARKET BY PROVIDING
TOTAL INTEGRATED LABORATORY
SOLUTIONS WITH EXCELLENT TECHNICAL
SUPPORT & CUSTOMER SERVICE*

VISION & MISSION

WHY CHOOSE US?

RELIABLE CUSTOMER CARE

AFFORDABLE PRICE

**TOTAL SOLUTIONS FOR YOUR
LABORATORY NEEDS**

DELIVERY IN TIME

**SAMPLES SERVICE CAN BE PICKED UP
JUST IN ONE FINGER ARRANGEMENT**

PRODUCTS

1. Genomics & Molecular Biology
2. Immunology
3. Labware
4. Cell/Tissue Culture

SERVICES

1. 1st BASE
2. Genetika Lab
3. Nanostring
4. Novogene
5. Oxford Nanopore Technologies

Genetika Lab

Genetika Lab has been providing scientific and professional services in this area for more than three years. We are one of the trusted private molecular laboratories in Indonesia because we always concern the standards of competency, work quality, consumer privacy protection and results accuracy. We are supported by our scientist and expertise in molecular biology and committed to providing our client with high quality services results.

GENETIKA LAB SERVICES

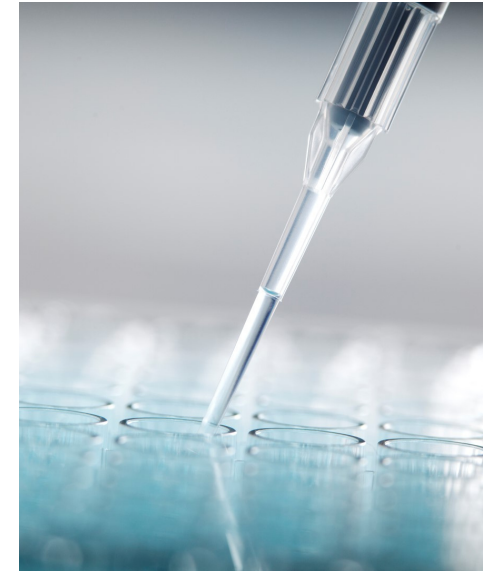

Bird sexing

DNA testing can be performed on blood cards or feathers for many different species. We use PCR to detect the presence of male and female chromosomes in the bird's DNA.

DNA Barcoding

DNA Barcoding Services is a recent and widely used molecular-based identification system that aims to identify biological specimens, and to assign them to a given species.

PCR Product Cloning

A set of experimental methods which are used to insert recombinant DNA into a vector. Vector is a carrier of DNA molecules that will replicate recombinant DNA fragments in host organisms.

GENETIKA LAB SERVICES

Full-Length 16S rRNA Sequencing

Using real-time, long-read nanopore sequencing. The 16S rRNA gene is present in all bacteria and archaea.

WGS SARS-CoV-2

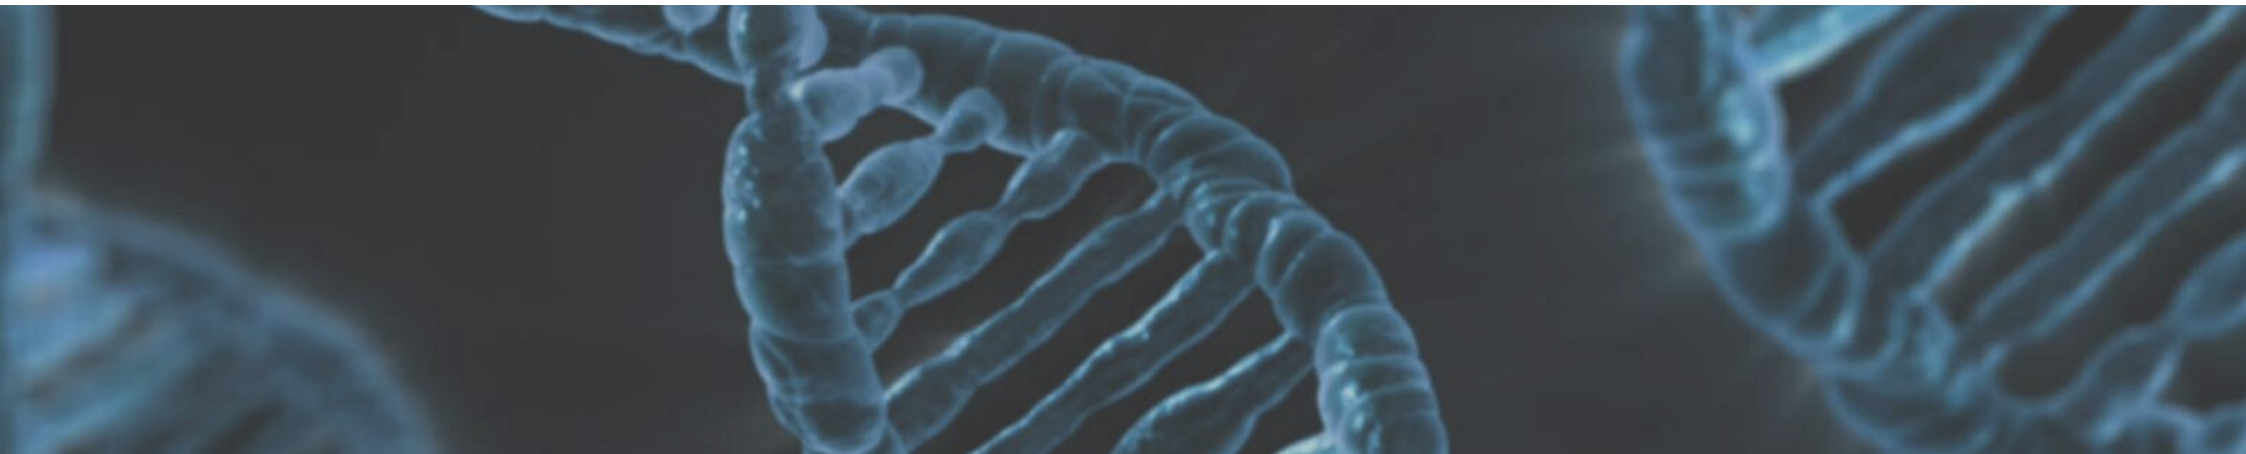

Whole genome sequencing (WGS) is a powerful tool to understand the transmission dynamics of outbreaks and inform outbreak control decisions.

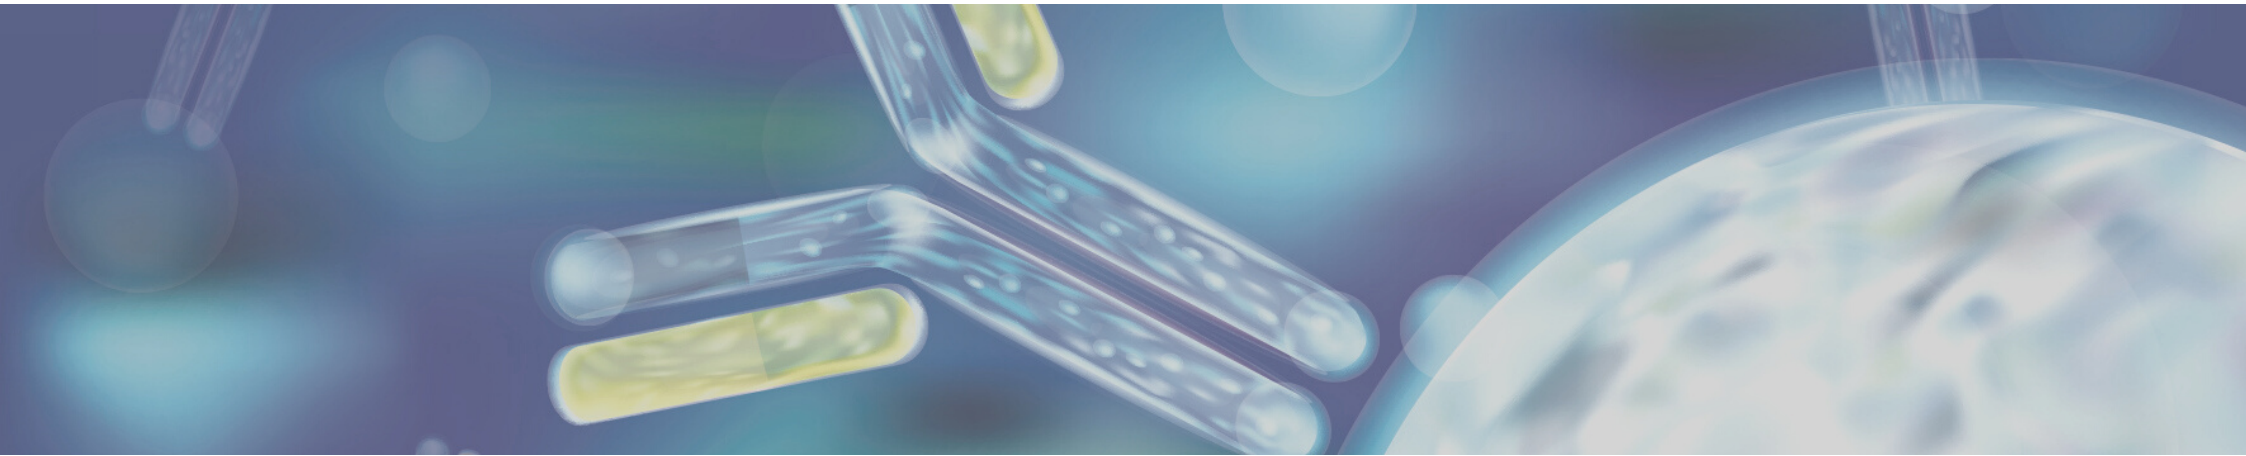

PBFD TESTING

To confirm the presence of psittacine beak and feather disease virus (PBFDv), feather samples were analyzed with the PCR method.
