

MASTERING EUKARYOTIC mRNA SEQUENCING

Explore, Analyze, and Validate

LEARNING PROGRAM OVERVIEW

This comprehensive learning program is designed for researchers, students, and professionals looking to master eukaryotic mRNA sequencing. Through a structured curriculum, **participants will gain both theoretical knowledge and practical insights into the complexities of mRNA sequencing data analysis.**

TOPICS COVERED

Introduction to eukaryotic mRNA sequencing

The concept of bioinformatic analysis for eukaryotic mRNA sequencing data

Understanding the mRNA sequencing data QCs

REQUIREMENT AND WHAT WILL YOU GET:

Basic Understanding of Molecular Biology, Experience with qPCR (Preferred), lunch break, module, certificate software & study case data will be provided.
